

# Christopher Buenrostro | Full Stack Software Engineer

Redwood City, CA, 94062

## Projects

---

**Watchmygold Webapp** | Python, Javascript, MySQL, Django, HTML, CSS, Requests, BeautifulSoup, Pythonanywhere

- Built a full-stack web app to track live metal prices using BeautifulSoup scraping and Django-based portfolio management.
- Deployed on PythonAnywhere with real-time data visualization demonstrating full stack deployment and cloud integration.

**Flashcard Web App** | Python, JavaScript, MySQL, Django, HTML, Tailwind CSS

- Developed an educational web app with CRUD operations, responsive UI, and user authentication.
- Strengthened understanding of relational modeling and full-stack web architecture.

**Automated Task Manager System** | Python, Scikit-learn, PyQt5

- Enhanced a GitHub-based desktop task manager by integrating an SVM model for intelligent task categorization.
- Completed as the capstone project for the Google IT Automation Certificate, emphasizing applied automation and machine learning concepts.

## Work Experience

---

**Teller** | Citibank, Redwood City, CA

**April 2023 - Present**

- Handled daily financial transactions accurately while protecting customer information and following strict security policies.
- Used tools like Salesforce and Eclipse to organize customer data, manage workflows, and make branch operations run more smoothly.
- Consistently ranked among top-performing tellers by improving processes and using a data-driven approach to solve problems—skills directly applicable to software development and technical work.

## Skills

---

**Languages:** Python, Java, Javascript, C++

**Frameworks:** Django, Flask, Tailwind, Bootstrap

**Tools:** Git, MySQL, Linux, APIs, Salesforce, Figma

## Education

---

**California State University Monterey Bay**

**June 2027**

B.S Computer Science

**Foothill College, Los Altos, CA**

**March 2025**

A.S Computer Science for Transfer

**Google IT Automation with Python Professional Certificate**

**July 2024**

Job Train, Menlo Park, CA

**San Jose State University, San Jose, CA**

**December 2022**

B.S Business Administration in Finance

## Coursework

---

- |  |                                       |   |                             |
|--|---------------------------------------|---|-----------------------------|
| • Advanced Data Structures and Algorithms in Java & Python | • Javascript for Programmers          | • Database Management Systems & Visualization | • Software Design in Java   |
| • MySQL Database Management System                         | • Computer Architecture/ Organization | • Discrete Math                               | • Linux & Operation Systems |
|  |                                       |   | • Cloud Computing in AWS    |
